Home: via giovanni battista Ferro, 1, 35132 Padova (Italy)

ABOUT ME

Born in Padova in 2001, I developed a passion for technology and video games from an early age, which naturally led me to start writing code as a teenager. After obtaining my High School Diploma in Humanities Studies, I chose to turn that passion into a profession by enrolling at the **Digital Bros Game Academy** in Milan, where I completed the full-time **Game Programming** course — a formative experience that gave me both the technical grounding and the collaborative mindset required to work in the software industry.
To build a deeper and more rigorous foundation, I then pursued a **Bachelor's Degree in Computer Science** at the **Università degli Studi di Padova**, which I completed in **December 2024**. The degree strengthened my understanding of core computer science principles — from algorithms and data structures to software engineering and systems design — and gave me the theoretical tools to approach complex problems methodically.
During my studies, I also gained hands-on professional experience: between 2023 and 2025, I collaborated as a **Unity Developer** within the **Precision Neuroscience & Neuromodulation Program** in Boston, contributing to the development of interactive software in support of neuroscience research. Since graduating, I have been working as a **Freelance Developer** across a range of projects — including web applications, CRM systems, and video games — while also taking on a role as **Full Stack Developer** at a **Stealth AI Research Lab** starting from May 2025.
Outside of work, I am an avid gamer, an accordion an piano player, and a long-time Scout volunteer.

WORK EXPERIENCE

Stealth AI Research Lab – Boston, United States

Full Stack Developer

[01/05/2025 – Current]

- Game development for research and applied purposes.
- Design and development of web applications.
- Cloud infrastructure management, including deployment pipelines and operations.
- Contribution to neuroscience and AI research initiatives through software development and technical support.

NeuroSalus – Italy

Co-Founder & CTO

[15/03/2025 – Current]

- Co-founded the company and assumed full ownership of its digital infrastructure and technical strategy.
- Leading the design and development of an interactive platform for patients, overseeing architecture decisions, development workflows, and system reliability.
- Management and customisation of CRM software to support internal operations and client relations.
- Responsible for the broader technical direction of the company, aligning engineering efforts with business objectives.

Precision Neuroscience & Neuromodulation Program @ Gordon Center for Medical Imaging – Boston, United States

Website: https://gordon.mgh.harvard.edu/research/precision-neuroscience-neuromodulation-program/ | **Business or sector:** Professional, scientific and technical activities

Unity Developer

[15/08/2023 – 01/05/2025]

- Design and development of virtual environments for cognitive assessment and AI research.
- Gamification of clinical and research assessment experiences to enhance engagement and data quality.
- Full-stack development within a research software ecosystem.

Remote position.

Zucchetti SpA – Padova, Italy

Intern — Serious Game Developer

[01/09/2024 – 30/11/2024]

- Designed and developed a serious game prototype aimed at introducing STEM students and professionals to core concepts in graphic design.
- Managed the full development lifecycle, from game design and environment layout through to implementation and testing.
- Produced comprehensive technical documentation covering project objectives, design decisions, implementation details, and outcomes.

Codemount Studio – Milano, Italy

Business or sector: Arts, entertainment and recreation

Collaborating Unity Developer

[01/04/2022 – 31/08/2022]

- Contributed to the development of an online real-time strategy game featuring blockchain integration.
- Implemented visual effects and handled both backend and frontend programming tasks.

Remote position.

Digital Bros Game Academy – Milano, Italy

Website: https://dbgameacademy.it/ | **Name of unit or department:** Game Programming - **Business or sector:** Arts, entertainment and recreation

Student Game Programmer

[01/10/2020 – 01/08/2021]

- Developed multiple academic projects using the Unity Engine, covering a range of genres and technical challenges.
- Took on team coordination responsibilities, gaining experience in collaborative workflows and project management.
- Handled backend and frontend programming across all projects.

IT Lab Limited – London, United Kingdom

Business or sector: Information and communication

IT Intern

[01/06/2018 – 30/06/2018]

- Shadowed client support and supply chain operations.
- Assisted in the maintenance of internal company servers.
- Developed professional communication skills in an English-speaking work environment.

PUBLICATIONS

[2024]

ECHOES OF FORM: Raising STEM students' awarness of art. This document describes the work carried out during the internship concluding my Bachelor's Degree in Computer Science at Zucchetti SpA's Padova office. The primary objective of the placement was the design and development of a serious game prototype aimed at raising awareness of graphic design concepts among STEM students and professionals.The document guides the reader through every phase of the internship. **Chapter 1** introduces the host company and its main characteristics. **Chapter 2** explores the motivations behind the project, the goals set at the outset, and the rationale for choosing the serious game format. **C hapter 3** — the core of the document — covers the key stages of the prototype's development, from the design of the game areas through to implementation and testing. Finally, **Chapter 4** reflects on the overall experience, analysing the results achieved, the skills applied and acquired, and identifying potential directions for future development.Readability is supported throughout by a hierarchical section structure, as well as a substantial number of figures, tables, and code snippets, all consistently numbered and captioned. A Glossary is also included for reference on key technical terms, alongside a Bibliography for further reading on specific topics discussed in the thesis.

Authors: Tonietto Filippo, Vardanega Tullio

EDUCATION AND TRAINING

Bachelor's Degree

Università degli Studi di Padova [01/10/2021 – 13/12/2024]

City: Padova | **Country:** Italy | **Website:** https://www.unipd.it/ | **Field(s) of study:** Computer Science | **Final grade:** 93/110 | **Thesis:** ECHOES OF FORM: Sensibilizzazione all'arte per studenti STEM

Certificate of Partecipation

Digital Bros Game Academy [01/10/2020 – 01/08/2021]

City: Milano | **Country:** Italy | **Website:** https://dbgameacademy.it/ | **Field(s) of study:** Game Programming

- Study of the C# and C++ programming languages applied to game development.
- Study of the *Unity Engine* and *Unreal Engine* frameworks.
- Teamwork and communication.

High School Diploma

I.I.S. Marchesi [01/09/2015 – 31/07/2020]

City: Padova | **Country:** Italy | **Website:** https://www.iismarchesi.edu.it/ | **Field(s) of study:** Arts and humanities : ● Humanities (except languages) not further defined ● Literature and linguistics ● Philosophy and ethics

LANGUAGE SKILLS

Mother tongue(s): Italian

Other language(s):

English

LISTENING C1 **READING** C1 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

OS

Windows / macOS

Programming Languages

Python / HTML / CSS / JavaScript / SQL / C / C# / C++

Frameworks

Unity Engine / React / Node.js e NPM / Qt

Software

Microsoft Office / Version Control System (Git)
